

ARASH JAMSHIDI

Full-Stack Developer

(438) 881-7634 | arashjamshidi12@gmail.com | linkedin.com/in/arash-jamshidi12 | github.com/arashj

Montreal, QC, Canada • Bilingual: French & English

PROFESSIONAL SUMMARY

Full-stack developer with 5+ years building and shipping production web applications end to end. Currently leading the React 19 / Spring Boot rewrite of an enterprise energy-optimization platform at EnerZam, modernizing a legacy monolith into a scalable, well-tested architecture. Deep across the stack — **TypeScript, React, and Redux/RTK Query** on the front end; **Java, Spring Boot, Node.js, and PostgreSQL** on the back end — with a focus on secure auth, real-time data, and measurable performance gains.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), Java, Python, SQL, HTML5, CSS3

Frontend: React 19, Next.js, Redux, RTK Query, Tailwind CSS, Responsive / Mobile-First Design, Figma

Backend: Spring Boot, Node.js, REST APIs, GraphQL, WebSockets / SSE, Hibernate / JPA, Prisma

Auth & Security: JWT, OAuth2, NextAuth, Refresh-Token Rotation, Role-Based Access Control (RBAC)

Databases: PostgreSQL, MongoDB, Supabase, Firebase, Redis

DevOps & Cloud: Docker, AWS, GitHub Actions, CI/CD, Git, Webpack, Vite, Maven / Gradle, Linux, Nginx

Testing & Quality: Jest, React Testing Library, Lighthouse, WCAG 2.1 AA (a11y), A/B Testing, ESLint / Prettier, TDD

Practices & Tools: Agile / Scrum, Jira, Confluence, Postman, VS Code

WORK EXPERIENCE

Full-Stack Developer — 2025 – Present

EnerZam — Montreal, QC

- Led the full rewrite of a legacy energy-management system using React 19, Redux, and RTK Query, modernizing a monolithic codebase into a scalable, maintainable architecture.
- Architected RESTful backend services with Spring Boot and PostgreSQL, supporting real-time energy monitoring across multiple client deployments with high availability.
- Implemented JWT-based authentication with refresh-token rotation and role-based access control, eliminating session-related vulnerabilities across the platform.
- Built 24/7 real-time measurement and alerting pipelines integrated into EnerZam's energy-optimization suite, giving operations teams continuous performance visibility.
- Partnered with cross-functional teams to align technical solutions with business goals, accelerating delivery of key features into the product suite.

Software Developer — 2022 – 2024

Université du Québec (ÉTS) — Montreal, QC

- Redesigned 3 core UI flows with responsive React components, increasing user engagement by 20% as measured by session-duration analytics.
- Partnered with the UX team on A/B testing protocols across 2 feature releases, achieving a 15% usability improvement measured by task-completion rate.
- Integrated 4 heterogeneous data sources via a normalized API layer, cutting data-retrieval time by 30% and improving reliability for 500+ daily active researchers.

Web Developer — 2013 – 2018

DayaTeca — Mashhad, Iran

- Engineered and tested 40+ reusable front-end components, reducing future development time by 30%.
- Led front-end application development, increasing code quality and cutting debugging time by 25%.
- Drove a 14% lift in user satisfaction through modern, responsive UI design, and improved code reliability by 35% with test-driven development (TDD).
- Streamlined project documentation, reducing onboarding time for new team members by 40%. Stack: JavaScript, HTML5, CSS3, Bootstrap, Git.

PROJECTS

NexShop — Freelance portfolio e-commerce platform built with Next.js, Prisma, NextAuth, and Supabase. Implements a full authentication flow, product management, and a responsive, accessible UI.

EDUCATION

M.Eng., Software Engineering — Université du Québec (ÉTS), Montreal, QC 2020 – 2022

B.Eng., Telecommunications / Electrical Engineering — Sadjad University, Mashhad, Iran 2017
