Professional Summary

- Software developer with more than 5 years experience in HCI, creating interactive, optimized software.
- Proficient in **ReactJS**, **NextJS, Redux, JavaScript** (ES6+), **TypeScript**, **MongoDB.**
- Skilled in building and consuming RESTful APIs and GraphQL for efficient and scalable applications.
- Experienced in troubleshooting, maintaining code through regular code reviews and adherence to best practices.
- Bilingual in **French** and **English**

Skills

- **Programming Languages:** HTML, React.js, Nodejs CSS/ Tailwind CSS, JavaScript (ES6+), Python, MongoDB.
- **IDEs/ Software/Tools:** Visual Studio, VS code, Jira, Confluence.
- **Version control:** Git/Github/GitLab.
- **Package managers:** Webpack, Babel, npm, or Yarn
- **Cloud:** AWS, Firebase

Work Experience

Full-stack developer
2025 – Current

EnerZam – Montréal, QC

- Contribute the redevelopment of a legacy system, rebuilding the software from the ground up with React 19, Redux, and RTK Query to deliver a modern, scalable, and maintainable application.
- Design and maintain backend services using Spring Boot and PostgreSQL, ensuring high performance and reliability.
- Implement secure authentication and authorization mechanisms with JWT, as well as caching strategies to optimize performance.
- Contribute to the development of real-time measurement and verification systems with 24/7 performance monitoring.
- Collaborate with cross-functional teams to align software solutions with business goals, integrating digital tools into EnerZam's suite of energy optimization products.

Software developer
2022 – 2024

University of Quebec (ÉTS), Montreal, Canada

- Engineered user-centered applications, boosting user engagement by 20% through responsive design.
- Collaborated with UI/UX teams on A/B testing, achieving a 15% increase in usability.
- Integrated multiple data sources, improving data retrieval efficiency by 30% with thorough documentation.

Technologies and Achievements:

- **React.js, Python, JavaScript, HTML5, CSS3, Git**
- Optimized request processing, reducing response time from 500 ms to 350 ms through algorithm refinement.
- Enhanced code readability by 40% using component-based design and pair programming.
- Increased user engagement by 25% through analytics dashboards and comprehensive A/B testing.

Web developer 2013 – 2018

DayaTeca, Mashhad, Iran

- Engineered and tested 40+ reusable front-end components, reducing future development time by 30%.
- Led front-end application development, increasing code quality and reducing debugging time by 25%.
- Streamlined project documentation, enhancing clarity and reducing onboarding time for new team members by 40%.

Technologies and Achievements:

- **JavaScript, HTML5, CSS3, Bootstrap, Git**
- Elevated user satisfaction by 14% through modern UI design and responsive techniques.
- Enhanced code reliability by 35% with test-driven development (TDD), significantly reducing post-release defects.

Education

- **Master's degree | Electrical and Computer Engineering** 2024
  University of Quebec (ÉTS), Montreal, Quebec, Canada

- **Bachelor's degree | Telecommunication-Electrical Engineering** 2017
  Sadjad University, Iran

Selected Projects

Task management web app

- **Description:** A task management application that allows users to track deadlines, add, delete, and modify tasks. Users can also assign dates and add descriptions to each task.
- **Technologies:** React.js, Tailwind CSS, HTML

Place Finder web app

- **Description:** This application helps users find places for their next visit and lists them to ensure they don't forget. Locations are sorted based on geographical proximity, and animations are used to make the interface more engaging.
- **Technologies:** React.js, Tailwind CSS, HTML

Certifications

- React - The Complete Guide 2024 (incl. Next.js, Redux) – Udemy

Award

- Scholarship from "Ubiquitous Haptics"
- Internal scholarship from ÉTS
